OBJECTIVE

Current college undergraduate dedicated to academic, social, and career growth. Seeking an opportunity to lend my knowledge in software development to improve user experience, communication abilities to enhance the flow of information in the workspace, and teamwork skills to increase efficiency in group work.

EDUCATION

University of Texas at Arlington, Texas
August 2017 – May 2020
Computer Science
GPA: 3.7 – Junior

Butler Community College, Kansas
January 2016 – July 2017
Liberal Arts Associate Degree
GPA: 4.0

English International School, Benin
December 2012 – July 2016
AS Level Cambridge
GPA: 3.5

EXPERIENCE

Full Stack Development
June 2018 – Present

Leading a group of four in the development of a student organization web app that connects members through messaging, announcements, events, etc. Developed using React, SendGrid, and the Firebase platform.

Mobile Development
November 2017 – January 2018

Built an android app with authentication, using Java and the Firebase platform, to help students study through customizable learning modes like quizzes, and to have the ability to share those learning modes with other users on the app.

LEADERSHIP

Tutor
August 2016 – Present

Guiding students in test-taking and note-taking in various academic subjects by organizing and leading study groups.

Peer Academic Leader
August 2018 – Present

Teaching a university student success course for incoming freshman students by making weekly lesson plans and collaborating with a faculty from the engineering department.

Vice President
March 2018 – Present

Assisting the president of the East African Society in creating an environment where students grow socially and academically through forums, events, and the organization's website
